New framework appointment for Grontmij with Welsh Water

Grontmij has been appointed to Morgan Est's team to deliver Dwr Cymru Welsh Water's AMP5 programme for South Wales.

Grontmij will work under a design and build contract for Morgan Est, to deliver the programme for clean and waste water infrastructure across South Wales. The scope of services will include Mechanical and Electrical Engineering, Civil and Structural Engineering, Environmental and Geotechnical Engineering.

The framework has a capital value of £125m (approximately EUR 150m) and estimated fee value for Grontmij of £5m (approximately EUR 6m) over the five year AMP5 period. Delivery of services under the framework will incorporate the skills of Grontmij's water, systems and renewables specialists across the group.

Lawrence Hughes, Group Director of Water & Energy at Grontmij, said: "Working with Morgan Est on the Welsh Water Framework is a key strategic appointment for Grontmij and we are delighted to be working in partnership with one of UK Water's most progressive companies. This latest appointment is testament to the fact that our project teams continue to deliver fresh ideas and innovative approaches to Morgan Est and the Water & Energy Utility Companies.

<ENDS>

Notes to editors

The calculation of the contract value is done on the basis of reasonable assumptions and consistent with assumptions made by the Company in the past in relation to the value of other contract wins.

About Grontmij

Grontmij is a leading sustainable design, engineering and management consultancy active in the growth markets of water, energy, transportation and sustainable planning and design. At the core of our business is the principle of sustainability by design that is a leading value proposition for our customers. Grontmij is the fourth largest engineering consultancy in Europe with over 150 offices across the region and a further 20 offices globally. We employ over 8,000 professionals around the world.

Our value chain of services stretches from major renewable water and energy infrastructure through designing efficient and environmentally-sensitive mobility and transportation networks to shaping our urban and green living spaces.

Whilst we are approaching our 100th anniversary, and benefit from the experience nearly a century provides, we prefer to look to the future to enhance the world we live in. By applying sustainability considerations to all our design, consultancy and management services right across the value chain, our highly-skilled, expert people are able to create lasting solutions that plan for, connect and respect the future.

About Morgan Est

Morgan Est is a leading UK provider of infrastructure services across the public and private sector. The business specialises in the design and delivery of complex engineering projects and provides specialist tunnelling, utilities, civil engineering and mechanical and electrical services to the water, transport and energy sectors. It is part of top UK construction and regeneration group Morgan Sindall plc which operates through five divisions of fit out, construction, infrastructure services, affordable housing and urban regeneration, which are supported by two specialist units of investments and professional services.
